# What is RamWide Jeopardy?

## **Purpose**

Ramwide Jeopardy serves an interactive multiplayer game. The goal of our game is to stay connected in a distributed world amongst unfortunate circumstances like COVID-19. The categories of the Jeopardy game are intended to be somewhat familiar to most people.

## **Implementation**

Our team built a GUI Jeopardy game called RamWide Jeopardy using AWT and Swift. RamWide Jeopardy consists of trivia questions on real world topics such as Major Cities, Marvel movies, Nationwide, Company logos/slogans, Covid-19 statistics, and more.

**Team Goal:** is to build an app to stay connected amongst unfortunate circumstances in a fun and interactive way

**Saturday Morning Status Report:** We have came up with the format layout of our game, imported useful data files, and now correcting compiling errors throughout our files.
